

DIVYANSHU TIWARI

Lucknow, Uttar Pradesh | 6392670416 | divyanshutiwari085@gmail.com | linkedin.com/in/divyanshutiwari | github.com/divyanshut32

SUMMARY

Computer Science (IoT) graduate with a strong foundation in Python, Java, and SQL, hands-on object-oriented development experience, and applied exposure to AI/ML, NLP, and cloud platforms (IBM Cloud, Firebase) through internships with IBM and Microsoft-backed programs. Comfortable working across the stack, from database design to front-end frameworks, with a track record of shipping working prototypes in agile, team-based settings and a strong drive to pick up new tools and platforms quickly.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: React.js, Django, TensorFlow, PyTorch, Scikit-learn, OpenCV

Cloud & Data: IBM Cloud, AutoAI, MongoDB, Firebase (NoSQL); working knowledge of SQL and relational database design

Concepts: Object-Oriented Programming, Design Patterns (MVC, Singleton, Factory), Database Design, Agile/Scrum, Machine Learning, NLP, RAG, LLMs, Data Analytics

Tools: Git, GitHub, VS Code, Jupyter, Anaconda

EXPERIENCE

AI & Cloud Intern — IBM

Jul 2025 – Aug 2025

- Built and deployed cloud-based AI models on IBM Cloud using AutoAI, covering data preparation, training, and evaluation.
- Developed chatbot solutions using NLP techniques to automate common user queries.

AI Intern — Microsoft

Dec 2024 – Jan 2025

- Implemented AI solutions using real-world datasets, from data cleaning through model evaluation.
- Applied machine learning concepts to solve practical, business-relevant problems.

Web Developer Intern — Y Hills

Nov 2024 – Feb 2025

- Developed web applications using Firebase (NoSQL) for real-time data handling and synchronization.
- Managed backend data flow across web and mobile platforms.
- Collaborated with a cross-functional team following Agile/Scrum practices, including daily standups and iterative delivery.

Service Desk Analyst — WideEyed Investigation

Apr 2022 – Sep 2022

- Verified customer-submitted data and cross-checked insurance policy details for accuracy and completeness before escalation.
- Investigated insurance policy details and coordinated with insurance companies to move claims and queries forward for resolution.
- Maintained clear documentation and communication throughout the verification and escalation process, supporting timely turnaround.

PROJECTS

RAG-Based AI Teaching Assistant

- Developed an AI assistant that improved response accuracy by 30% using vector search over course content.
- Integrated Whisper for real-time speech-to-text processing.
- Implemented LLM-based, context-aware responses using retrieval-augmented generation (RAG).
- Structured the backend using OOP principles and modular design patterns for maintainability.

Travel AI Agent

- Built an AI assistant that generates personalized travel recommendations from user preferences.
- Implemented NLP for conversational, multi-turn query handling.
- Designed backend logic for trip cost estimation.

Plant Disease Detection System

- Developed a CNN model in TensorFlow/PyTorch for multi-class plant disease classification from leaf images.

EDUCATION

B.Tech in Computer Science (IoT)

2022 – 2026

School of Management Sciences, Lucknow

ACHIEVEMENTS

- District-level Kabaddi Player (2016–2020) — demonstrated leadership, teamwork, and discipline.
